

BANDARU JNANA SIVA SAI GANESWAR

AI Engineer | Generative AI | LLM & Agentic Systems | Python | Azure

Amalapuram, Andhra Pradesh, India | +91-8463990472 | bandarujnanasivasaigneswar@gmail.com | linkedin.com/in/bandaru-jnana-siva-saiganeswar

PROFESSIONAL SUMMARY

AI Engineer with 1 year of professional experience building and deploying LLM-powered agent pipelines, AI automation solutions, REST APIs, FastAPI microservices, and cloud-based applications. Experienced in Python, SQL, FastAPI, CrewAI, Groq LLMs, Google Gemini, n8n, Azure, Docker, and CI/CD. Hands-on experience developing production solutions for document intelligence, job-data extraction, security monitoring, recruiting platforms, and AI-driven workflow automation. Skilled in Generative AI, LLMs, AI agents, prompt engineering, automated data extraction, NLP, and scalable AI systems.

PROFESSIONAL EXPERIENCE

AI Engineer · Unnanu AI Technologies India Pvt Ltd | Hyderabad, Telangana | Serving Notice Period

AI-Powered Job Posting & Document Intelligence Platform

- Developed a FastAPI-based AI service that automates DOCX/PDF job-document ingestion, extraction, formatting, and job-board publishing.
- Built an 8-stage CrewAI + Groq LLM agent pipeline to extract structured job metadata from unstructured documents.
- Reduced a multi-hour manual recruitment workflow to a sub-minute API-driven process and deployed it using Docker, Azure Blob Storage, and Azure Pipelines CI/CD.

Resume Chatbot · AI-Powered Candidate Matching

- Built a production FastAPI microservice powering a conversational resume and candidate-matching chatbot for the Unnanu Hire ATS, deployed using Docker, Azure Web App, and Azure Pipelines CI/CD.
- Designed a hybrid RAG pipeline combining structured column-routed retrieval with Azure Cognitive Search using BM25 and CrossEncoder re-ranking, reducing unnecessary LLM context and improving candidate-query precision.
- Integrated live candidate and vacancy APIs with multi-process SQLite session management, resilient fallback handling, and defensive data processing for reliable conversational recruiting workflows.

AI-Powered DNS Security & Compliance Agent

- Developed an AI-powered agent for DNS security, domain validation, SSL/TLS monitoring, and compliance reporting.
- Automated validation of 10+ DNS record types and integrated GoDaddy APIs with Google Gemini for configuration analysis.
- Automated security report generation with Playwright screenshots and scheduled execution using APScheduler.

Full-Stack AI Job Marketplace

- Contributed to a production job marketplace with candidate/employer portals, resume parsing, authentication, search, and recruiter matching.
- Built PDF/DOCX resume-processing and skill-extraction pipelines using Azure SQL and Drizzle ORM.
- Developed and integrated 60+ REST APIs with Google/LinkedIn OAuth2, OTP authentication, Azure Blob Storage, Playwright E2E testing, and Azure Pipelines CI/CD.

LinkedIn AI Sourcing Extension

- Developed a Manifest V3 Chrome extension for extracting structured LinkedIn profile data and transferring candidate information to an internal recruiting CRM.
- Implemented normalized candidate schemas, REST API integration, JSON export, and robust DOM extraction.

Slack-Native Recruiting Application

- Developed recruiting workflows using Node.js, Express, Slack Bolt SDK, and Slack Web API.
- Implemented Slack commands, interactive modals, OAuth 2.0 workspace installation, resume uploads, and application workflows.
- Deployed on Azure App Service with automated Jest and JSDOM testing.

AI Workflow Automation with n8n

- Designed and deployed 9 production AI workflows integrating LinkedIn, Facebook, Slack, Google Drive, Zoho Recruit, ZipRecruiter, Fireflies.ai, and Google Gemini.
- Built webhook- and schedule-driven workflows for AI content generation, publishing, data synchronization, document archival, and cleanup.
- Built Fireflies-to-Google Drive automation for transcript retrieval, audio processing, archival, deduplication, and scheduled processing.

INTERNSHIP EXPERIENCE

Project Trainee — RINL (Vizag Steel Plant) | Visakhapatnam, Andhra Pradesh | Dec 2024 – Mar 2025

- Developed Java, Spring Boot and Hibernate backend components for enterprise applications.
- Optimized database queries using advanced SQL indexing, achieving a reported 30% improvement in query efficiency.
- Contributed to internal tools that reduced operational waiting time.

Web Development Intern — Techno Hacks | Nov 2024 – Dec 2024

- Developed responsive web interfaces using HTML, CSS and JavaScript.
- Integrated frontend interfaces with Python-based backend functionality.

Summer Intern — byteXL | Vadodara, Gujarat | May 2024 – Jun 2024

- Completed intensive data-structures and algorithms training.
- Developed mini full-stack projects following software development best practices.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, TypeScript, Java

AI / Machine Learning / LLM: LLMs, Generative AI, Prompt Engineering, LLM Agent Pipelines, CrewAI, Groq LLM API, Google Gemini, Computer Vision, Machine Learning

AI & Agent Automation: CrewAI, n8n, APScheduler, AI workflow orchestration, document intelligence, automated data extraction

Backend & APIs: FastAPI, Uvicorn, Node.js, Express, Spring Boot, Hibernate, REST APIs, OAuth 2.0, Slack Bolt SDK

Data & Databases: Azure SQL, SQL, Drizzle ORM, relational database design, structured data extraction, document/data processing

Document & Data Processing: PDF processing, DOCX processing, python-docx, Mammoth, LibreOffice, Regex, dnspython

Cloud & DevOps: Microsoft Azure, Azure Blob Storage, Azure App Service, Azure Pipelines, Docker, CI/CD

Frontend: React, TypeScript, TanStack Query, Tailwind CSS, Radix UI, Vite, HTML, CSS, Chrome Extensions / Manifest V3

Testing: Playwright, Jest, JSDOM

Integrations: LinkedIn API, Google Drive API, Slack API, Facebook Graph API, Gmail API, GoDaddy API, Fireflies.ai API, Zoho Recruit API, ZipRecruiter XML

CERTIFICATIONS

Data Science Certification — Skill India / Reliance Foundation | Machine Learning with Python — Infosys Springboard | Networking Essentials — Cisco

KEY ACHIEVEMENTS

- Automated multi-hour document-processing and job-posting workflows into sub-minute API-driven processes.
- Developed production LLM-powered agent pipelines using CrewAI and Groq.
- Built and deployed 9 production AI workflows integrating multiple APIs and business systems.
- Achieved a reported 30% database query efficiency improvement through SQL optimization.
- Developed a real-time computer-vision drowsiness detection system with a reported 20% improvement in driver safety during testing.

EDUCATION

Parul University | B.Tech — Computer Science & Engineering (Artificial Intelligence) | Aug 2021 – May 2025 | Vadodara, Gujarat

Vidhyanidhi Junior College | Intermediate (12th) | Apr 2019 – Apr 2021 | Amalapuram, Andhra Pradesh

Z.P.P Boys High School | SSC (10th) | Apr 2018 – Apr 2019 | Amalapuram, Andhra Pradesh

LANGUAGES

English | Telugu | Hindi
